Nexacro's Multi-Layout Manager

Multi-Layout Manager (MLM) simplifies the process of supporting multiple form factors, while reducing the time, effort, and cost required to support new devices.

Using a visual, drag-and-drop/WSYWIG interface you are able to format the app's UI for different form factors, all utilizing the same code.

MLM is the preferred solution for multi-device support among app developers.
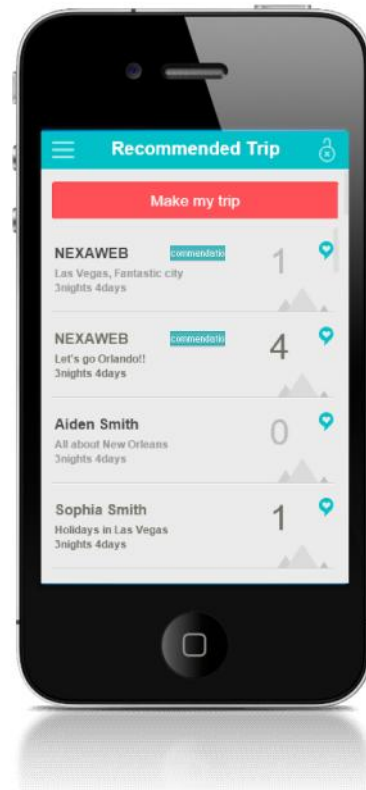

THE MULTI-LAYOUT MANAGER:

- Reduces total time and development cost by 30-50% by enabling developers to efficiently and effectively keep track of multiple layouts in a drag-and-drop visual editor that is intuitive and easy to use.
- Saves development resources by allowing developers to rapidly design screens for different form factors from a single code base.
- Provides the developer with a robust set of visual design tools to effectively manage multiple layouts easily, while promoting a simpler and faster development cycle across a range of display sizes.
- Enables developers to rapidly design application screens for devices with different display sizes and form factors. UI elements can be re-used across several screen layouts without additional coding, using drag-and-drop functionality to easily redesign layouts for new screen sizes.

BENEFITS

MLM reduces development costs and saves developers time by eliminating the need for custom coding for every device screen size.

MLM empowers developers by employing both adaptive and responsive design techniques. Adaptive layouts provide a consistency of design at different key device sizes and responsive layout scaling allows for ideal support of all devices between those key sizes.

Get more done, easier, with Nexacro Studio's MLM. Quickly design screen layouts for supporting new devices as they are released into the marketplace…with no extra development time or cost.

About Nexaweb

Nexaweb provides software and services for the development of enterprise-class mobile, tablet, and web applications. Nexaweb was founded in 2000, offering enterprise tools and services to develop web and mobile applications for the enterprise. Today, Nexaweb has more than 2,500 customers around the world across a range of industries.
